

Shardul Kulkarni

SOFTWARE DEVELOPER | JAVA DEVELOPER

+91-8668782091 | shardulKulkarni2730@gmail.com | [LinkedIn Profile](#) [GitHub](#)

Professional Summary

Motivated and skilled software developer with a solid Java, and SQL, foundation. Currently advancing expertise through a Java full-stack development program. Experienced in designing and implementing scalable systems, including a robust entrance exam platform, and committed to leveraging technical skills to drive innovation and deliver impactful solutions.

Education

- **Vishwakarma University, — Pune** 2020 - 2023
B-tech in Computer Engineering CGPA: 8.5
- **Satara Polytechnic — Satara** 2016 - 2019
Diploma Computer Science Per:65
- **Ananat English School — Satara** 2015 - 2016
10th

Technical Skills

- **Programming Languages:** Core Java 8, J2EE, Object Oriented Programming.
- **Database:** SQL, MySQL
- **Web Development :** HTML, CSS, JavaScript, REST API Development, React.js
- **Framework:** Spring Boot Framework , Hibernate.
- **Tools: Version Control:** Git; **Build Tools:** Maven.

Projects

- **e-Learning platform :**
 - **Developed a comprehensive** e-learning platform using React for front-end development, featuring web pages for online courses, resources, and interactive tools. This facilitated remote learning and skill development,
 - **Integrated an API for secure mobile login** using OTP authentication, improving web performance, and user security, and simplifying device access. This implementation streamlined the login processes and ensured data security, improving the user experience.
 - Utilized **MySQL** and **Java** for back-end data management, ensuring efficient storage and retrieval of course materials and user data to support platform scalability and performance.
- **Vehicle Parking Management System :**
 - **Designed and implemented** a scalable vehicle parking management system using HTML and CSS for front-end development, and MySQL and Java for back-end data management. This system efficiently manages multiple parking floors and spaces, optimizing parking space.
 - **Developed a user-friendly** interface that enables users to input vehicle details, check real-time parking availability, and retrieve information about parked vehicles. This functionality improves user satisfaction by providing convenient access to parking services and reducing wait times.
 - **Created and maintained** a MySQL database to store vehicle information and parking space availability, ensuring reliable data storage and fast retrieval. This set-up of databases supports the seamless operation of the parking management system, enhancing overall reliability, performance, and unit testing.
- **Yashwant SmartShop :** [GitHub Link](#)
 - **End-to-End Development:** Designed and implemented both the front end using Swing Framework and the back end with Java and MySQL, ensuring seamless integration and user-friendly interfaces for efficient shop management.
 - **Optimized Operations:** Automated stock management, billing, and reporting processes, achieving a **30% reduction in manual effort** and improving accuracy in daily operations.
 - **Scalable Solution Delivery:** Developed a robust admin system for user management and attendance tracking, increasing employee oversight and improving shop efficiency by **25%** within the first month of deployment.

Internship / Experience

- **Cognizant** Mar 2024 - May 2024
Software Developer Intern
 - Project Management Approaches: Conducted a comparative analysis of waterfall and Agile methodologies, identifying key principles advantages and applications in software development projects.
 - User Stories Management: Created, prioritized, and managed user stories, ensuring alignment with client requirements and project goals.
 - Agile Roles and Ceremonies: Assigned roles and actively participated in Agile ceremonies, including sprint planning, daily standings, and retrospectives, to enhance teamwork and project delivery efficiency.
- **Nebula Technology, Pune** Jan 2023 - Jun 2023
Front End Developer, Intern
 - Developed a user-centric interface for a state government hospital's human milk bank application using React.js, overcoming challenges to streamline the management of donor and recipient data and improve operational efficiency.
 - Enhanced human milk tracking and distribution through features that addressed challenges in ensuring timely and accurate inventory updates, optimizing resource allocation, and smoothing the distribution process.
 - Designed a system for managing milk quality reports, prioritizing high-quality donations and contributing to a 20% increase in user satisfaction by facilitating easier access to donor milk for newborns.
- **Vishwakarma University, Pune** Nov 2021 - Mar 2022
Java Full Stack Developer, Intern
 - Developed an Entrance Exam Software to manage student sign-up, attendance, and exam sessions across three sections, with secure authentication using personal email IDs and real-time result tracking.
 - Integrated Firebase API for real-time database connectivity, ensuring secure data access, immediate student updates, and efficient handling of exam attendance and marks to generate reports on successful candidates.
 - Improved administrative efficiency and user experience by 10-20% through an intuitive interface, allowing the delivery of seamless results to examiners and the streamlined feedback for students and administrators.

Non-Technical Skills

- **Communication — Problem Solving — Troubleshoot.:**

Certification

- **SQL**, The Complete SQL Bootcamp, Udemy, June 2024. [Certificate Link](#)
- **Java Logical Challenges**, Udemy, September 2024. [Certificate Link](#)
- **Full Stack Development** August 2023 – February 2024. [Certificate Link](#)

Achievements

- **Identifying Government Infrastructure Vulnerabilities** CERTin IDs: 37289421, 93127421. [Certificate Link](#)
- **IBM Digital Badge:** - Earned IBM's Digital Badge for Cyber Security and Forensics. [Certificate Link](#)
- **Developed and implemented an IoT-based Home Automation System** as part of the final year project, enabling seamless remote control of home appliances through an Android mobile app, enhancing energy efficiency and convenience.
